EDUCATION

1996-2001
Master of Science Degree Aerospace Computer and Software Systems

Saint-Petersburg State University of Aerospace Instrumentation, Saint-Petersburg, Russia

PROFILE

20 years of analyzing, understanding, designing, developing and effective interaction between business requirements, engineering design and implementation. All this time I have helped my colleagues, customers and partners to improve their user experience by creating innovative business solutions in 1C Enterprise and SAP ecosystems. Months of meetings and negotiations, millions of lines of code and hundreds of completed projects led me to new challenges and achievements that lie ahead.

EXPERIENCE

Data migration SAP developer
WÜRTH-IT || Bad Mergentheim, Germany || FEB 2022 – Present

➢ Partly managed data migration projects.
➢ Worked on several SAP ERP implementation projects as ABAP data migration developer/consultant.
➢ Developed many apps using ABAP, Typescript (UI5, Nest JS, Next JS, React), SQL.
➢ Negotiated with the customers during the project

IT MANAGER
WÜRTH NORTH-WEST || Saint-Petersburg || JUNE 2018 – FEB 2022

➢ Managed a team of 4 IT experts.
➢ Worked on SAP ERP implementation project as IT expert and key-user.
➢ Successfully performed project of data migration from MSP/A, Monolith and local CRM systems to the SAP ERP (from the customer side).
➢ As project manager, software architect and developer successfully implemented new HR and salary calculation system based on the 1C Enterprise platform and "from hire to retire" process.
➢ Developed many local apps and micro services, performed data integration between SAP ERP and local apps

Chief Information Officer
VEZA || Saint-Petersburg || DECEMBER 2015 - JUNE 2018

➢ Managed a team of 6 IT experts.
➢ As project manager and software architect successfully implemented new PDM, ERP and CRM system for the mechanical engineering integrated with each other.
➢ Successfully performed project of data migration from old sales system to the new ERP/CRM system.
➢ Created unique integrated process from lead to cash through development and production. (CRM->Inventor->PDM->ERP).
➢ As project manager and software architect successfully implemented new HR and salary calculation system.

MAXIM CHERNYSHOV

RECENT PROJECTS CONTINUED…

WÜRTH NORTH-WEST
HR System implementation project

As project manager, software architect and developer successfully managed the local HR system implementation project. The scope of the project includes all the main processes of personnel management as well as the processes of personnel accounting, payroll accounting, planning of labor costs, calculating personal income tax and insurance premiums. Developed a lot of reports, output forms, integration functions and procedures using built-in programing language.

WÜRTH NORTH-WEST
SAP WS1/WF1/BO/E-Shop/Speedytouch "BIG BANG" project

As IT expert and KEY user took significant part in the project. I was responsible for BASIS, BI/BO module, roles and authorizations, translations, Seeburger setup and mapping developments, was involved in the implementation processes of all other modules. Developed exchange procedures with local banking and local HR system.

WÜRTH NORTH-WEST
Local SAP HANA and UI5 development

Implemented local SAP HANA express data warehouse, exchange routines with SAP WS1, WF1 and BO systems. Enabled Odata V2/V4 services based on SAP Hana using Cloud application programming model, developed local Fiori and UI5 reports and services based on the Odata services.

VEZA
PDM - ERP - CRM implementation project

As project manager successfully implemented the unique system for the machinery production. End-to-end business process from CRM through order, automated creation of Design and technological documentation in Autodesk Inventor, automated import to the PDM, automated or in several cases assisted development of creation technology and rationing, automated creation of a manufacturing specification in ERP, production planning, logistics, material management, sales, accounting and salary.

LISSANT
ERP and PDM implementation project

As project manager and IT expert replaced old outdated production system with a latest version of 1C ERP. Implemented PDM system as a source system for creation production technology, rationing and manufacturing specification for ERP. Successfully implemented the production planning process from scratch.
